Creating Young Thinkers with Great Futures

Dynamic Kids 2015

Effective * Affordable * Convenient

Developing Children’s English

Success is the Sum of Small Efforts,
Repeated Day In and Day Out.

Robert Collier

As a once-a-week programme, we measure the success of each student by their progress over time based on different learning objectives. This forms the basis of the student reports our students receive after Terms 2 and 4. Truly, every student has grown and can be proud of their accomplishments.

In the 2015, students began reading, differentiating between long and short vowel sounds, articulating more clearly, learning to write a complete sentence independently, and understanding the writing process. They are learning about literary devices and developing higher order thinking skills. They are reading and writing with greater confidence.

New Teachers

New faces will be seen around Dynamic Language Centre in 2016. We have been busy hiring high-quality, experienced teachers who will continue helping us develop our students as English thinkers and learners.

Check out our new expanded scheduled today.
Student Accomplishments

Through our leveled reading program and novel studies, our teachers have witnessed our students’ love of reading grow. In Term 4, we opened our lending library and students are making good use of it! One parent commented that her daughter hadn’t had the confidence to read an English novel prior to coming to Dynamic Kids. New titles are continually added so take full advantage of our books!

Our results speak for themselves; students are growing in their English abilities all around and are enjoying learning in our classrooms. Dynamic Kids is not content to rest on these results but is eager to continually give your student a better English education experience. Look for the use of the new Oxford Discover curriculum for our Primary and Upper Primary students. This international-school standard curriculum is unit-theme based for more effective learning. New teachers will add dimension to our courses. New times will give you greater flexibility in scheduling. We look forward to having you with us in 2016!

Experiential Learning

What does it mean? More importantly, what will it mean for my child?

Experiential learning is the process of learning through hand’s-on experience. It moves beyond theory and passive reception to active student involvement and discovery in the learning process.

What are the results? Experiential learning has a dramatic impact upon students. They are more engaged and invested in learning. They discover the answers for themselves, increasing both their interest in and retention of concepts and vocabulary.

Experiential learning activities are the cornerstone of our curriculum changes for 2016. Each term will have specific learning themes engaging students and making learning come alive. Register today for 2016 and discover the fun! Creating Young Thinkers with Great Futures!

Farewell to Teacher Natalie

With grateful but heavy hearts, we bid farewell to Teacher Natalie. After over a year of committed teaching to both youth and adults, she will return to the U.S. to pursue her Master’s studies.

From Dynamic Kids - a big “Thank you!” Teacher Natalie taught with excellence, creativity and passion. She brought her appetite for literature, writing, and science. We will miss your warm smile and the laughter around the Centre. All the best!
